Accidents happen. And while a Mercedes-Benz Certified Collision Repair Center can't undo the accident, we can undo the damage.

For the last 33 years, Class Auto Center has served dutifully as the approved collision center for Mercedes-Benz of Long Beach. Class Auto Center has surpassed all requirements for a CCRC facility and is consistently inspected by Mercedes-Benz.

When you buy a Mercedes-Benz, you are purchasing the luxury, safety and performance associated with the Mercedes-Benz family. Though some body shops may advertise inexpensive repairs, often times with lower prices comes lower quality with non-factory parts. A Mercedes-Benz Certified Collision Repair Center (CCRC) has the resources necessary to restore your vehicle to its pre-accident condition. Furthermore, all CCRC work is guaranteed for as long as you own or lease your vehicle.

Class Auto is one of just five collision centers in California recognized by Mercedes-Benz as an Elite Certified Aluminum Structural Repair Facility. This state-of-the-art certification ensures both our tools and technicians are advanced in the field of aluminum repair, and are highly qualified to perform work on your CL, SL, SLS or S-Class Mercedes-Benz.

Damage often runs deep, affecting the complex structural integrity of mechanical and safety systems. Limiting repairs to the site of impact may not be enough to restore performance. A Mercedes-Benz trained technician has the experience necessary to differentiate a simple bumper job from more complicated structural damage.

At Class Auto Center your vehicle is in the very capable hands of Mercedes-Benz trained technicians, who have each undergone several hours of vehicle-specific training. We use only Mercedes-Benz factory-approved repair procedures original Mercedes-Benz parts. These parts are identical to those originally installed on your Mercedes-Benz and thus the only ones capable of preserving your vehicle's handling and performance.

By upholding Mercedes-Benz's strict factory guidelines, we will preserve your vehicle's beauty, class and value with both timeliness and uncompromising precision.

Boasting razor-sharp looks and cutting-edge technology, your Mercedes-Benz was designed to perform to the highest of standards in the automotive industry.

Let's keep it that way. For more information, please call (562) 595-6400 or visit us at www.classautocenter.com.
